Quiz And Exam Schedule

Sewer Scope Certified Course Syllabus

Quizzes are presented at the end of each chapter and a passing grade is required to advance to the next chapter. A final exam will be presented at the end of the entire course and a passing grade is required to receive the certificate.

Course Out line

This course will prepare you for the real-world application of sewer scoping. You'll learn how to identify access, evaluate condition and stay consistent. As a sewer inspector you inspect for condition not code so we will focus on applying that knowledge base for condition related issues. And as codes can change town-to-town and state-to-state it will be your responsibility to investigate your local plumbing codes. If you are a contractor or plumber this course can be applied right alongside your bank of plumbing code knowledge. We will cover many inspection aspects because sewer inspections are important can be tedious and you never want to underdeliver to your inspection clients. We will cover the following.

Chapters

-Recommended Equipment

-Necessary Hand Tools

-Ideal Entry Points

-Interior Drainpipe Materials

-Side Sewer Pipe Materials

-Rubber Hub Connections

-Outside Connections

-Common Condition Items

-Actionable VS Non-Actionable Items

-Evaluate M.O.S.T. Pipes

-Maintenance And Repair Methods

-Sewer Main Connection Types

-Mystery Videos

-Final Test

Course cost $699.00 web only or $2,499.00 with 5-day shadow of Sewer Inspector tech, 20 inspections on average.
